

All AFSAC Online Account Users

BLUF: FYSA only. In the near future, the process to access AFSAC Online (AOL) will change. Users will access AOL via the Security Cooperation Information Portal (SCIP). Please ensure widest dissemination for situational awareness across the community. No user action required at this time. The AFSAC PMO will send focused emails to account holders communicating required steps and process changes in the coming weeks.

1. **WHAT:** Access to AFSAC Online is changing from user name/password to 2-factor authentication. User access to AOL resources will require either the DoD Common Access Cards (CAC) or RSA SecurID tokens. All AOL users will need a SCIP account. Instructions for obtaining a SCIP account will come in future emails and be posted on the AOL system home page.
2. **WHY:** AOL is currently not compliant with various DoD policies directing use of Public Key Infrastructure (PKI) or, when not feasible, an alternate form of 2-factor authentication when accessing DoD IT systems. Your CAC satisfies the PKI requirement while the RSA SecurID tokens provide an alternate 2-factor authentication for system access. SCIP supports both forms.
3. **WHEN:** We are targeting late summer of 2019 for implementation, however, the schedule isn't firm. This is primarily due to the availability of the RSA SecurID tokens. We are working closely with DSCA IM&T as they manage distribution of the tokens for all SCIP account holders. DSCA must acquire additional tokens to support our effort via contracting actions.
4. **WHO:** All AOL account holders.
5. **NEXT STEPS:** For now, stand by. Periodic emails will follow to keep you informed. In addition, information will be posted on the AOL system home page.

Should you have questions, please contact me, or my POCs for this action, Mr. John Williams or Mr. Thomas Asojo, both cc'd on this email.
